Our values

Committed to providing excellence and constantly exceeding previous efforts.

Sustain

A fresh outlook on business, underpinned by experience and knowledge.

Ball

Strive

Our mission is to be the supplier of choice, the employer of choice and the investment of choice!

Proactively committed to meeting the needs of our stakeholders without compromising the future of generations to come.

Conserve

We take responsibility to protect the environment in which we work, thereby conserving a legacy for the future.

Develop

Investing time, resources and knowledge in our youth, employees, clients and the communities in which we operate.

Introduction

The condensed consolidated interim results of TWK Agriculture Holdings (Pty) Ltd for the six months ended 28 February 2019 comprise of the Company, all its subsidiaries and jointly controlled entities (jointly referred to as the Group).

The accounting policies applied in the preparation of these condensed consolidated interim results are in accordance with IFRS and are consistent with the accounting policies applied in the preparation of the Group's previous audited consolidated annual financial statements.

These interim results have not been audited or independently reviewed by the Group's external auditors. The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Group's annual financial statements as at 31 August 2018.

All the amounts relate to the Group's results unless otherwise specified.

The Directors of the Group take full responsibility for the preparation of this report.

The preparation of the Group's results was supervised by the Group Chief Financial Officer, JEW Fivaz, and approved by the Board of Directors on 27 March 2019.

The results were made available publicly on 28 March 2019.

Key financial indicators

Earnings before interest and tax (EBIT)

R216,62m (2018: R185,42m)

Basic earnings per share

600,69c (2018: 434,81c)

Diluted normalised headline earnings per share

616.80c

(2018: 438,60c)

Debt to equity ratio

Cash from operating activities

R219,65m

(2018: R198.86m)

Business and financial review

The South African economic performance over the last few years has been disappointing. Statistics South Africa confirmed that the economy grew just 0,8% in 2018, after 1,4% growth in 2017.

South Africa suffered a recession in the first half of 2018 as farming plunged but growth has since recovered as the economy expanded in the final quarter of last year helped by growth in agriculture and manufacturing. Agriculture expanded by 7,9% in the last quarter of 2018, recovering from the drought and made a positive contribution to growth, after having declined at a double digit pace earlier on in 2018.

While the 2018/19 summer grains and oilseeds production started on a bad footing due to the dry climate, the weather conditions have improved significantly. The crop is generally in good shape across the country, following widespread rainfall in February. This has led to vast improvements in dam levels which should support areas that are under irrigation. The South African Weather Service sees a likelihood of above-normal rainfall conditions over the summer rainfall regions during early autumn, but this may not cover all grains and oilseed-growing regions.

TWK's overall results for the first six months are reflective of the well-diversified agricultural business model which contributed to the year-on-year growth and success of the Group. The growth and performance contribution for the first six months of 2018 came from the Retail and Mechanisation segment driven by strong fertiliser sales. The Timber segment contributed to the growth and performance in the first six months of 2019, driven by increased timber sales. The general trading conditions came under pressure, which resulted in decreased sales and net profit in the Retail segment compared to the previous year.

Against the backdrop of uncertain economic and political conditions, slow economic growth and later-than-normal rain in the local summer rainfall areas, revenue increased by 4,3% from R3,729 billion to R3,888 billion. TWK's results were positively impacted by increased timber sale volumes, improved margins, cost control and effective working capital management. While fertiliser sales volumes decreased by approximately 1,7%, the Group revenue was supported by timber sales. This, together with improved efficiencies, resulted in an increase of 16,7% in operating profit to R226,63 million (Feb 2018: R194,23 million) which equated to an operating profit margin of 5,8% (Feb 2018: 5,2%). Profit after tax increased to R116,62 million which is 25,6% higher than the R92,88 million of the corresponding period. Normalised headline earnings increased to 654,25 cents per share, which is 39,1% higher than the corresponding period.

The Group's financial position is stronger with total assets having increased by 16,4% from R3,869 billion to R4,504 billion. Net cash is lower due to an increase in inventory and debtors levels, however cash from operating activities before changes in operating capital increased by 10,5% to R219,65 million. The Group's gearing was 142% at 28 February 2019 which is slightly higher than the corresponding period. The net asset value per share increased by 12,4% to R74,84 per share at 28 February 2019 compared to R66,59 as at 28 February 2018.

Total assets continued to increase due to capital expenditure, an increase in inventories and debtors as well as an increase in the investment and fair value of biological assets. The debtors' book was higher in February than in August which is in line with the cyclical nature of the agricultural industry. Assets are evaluated on a continuous basis where applicable, and the necessary impairments have been taken.

Operational review

Timber

The Timber segment experienced favourable market conditions. Revenue increased by 0,6% from R1,198 billion to R1,206 billion despite lower than expected sales in the local markets, with high volumes being exported to international markets. TWK managed to earn excellent yields from own and bought standing plantations. Revenue was also supported by the weakening of the rand. EBITDA increased dramatically by 84,6% to R147,41 million and the EBITDA margin increased from 6,7% to 12,2%. There is a growing demand for TWK wood chips in the export market and it is expected that export volumes will increase in the coming year with a concomitant increase in the price of exported chips.

Local and international demand for eucalyptus pulpwood is positive and deliveries to these markets have increased by 5% compared to the 2018 volumes. It is expected that deliveries will further increase to 10% as a result of higher demand. The demand for wattle pulpwood is also more favourable, although deliveries are approximately 16% lower compared to 2018 as the felling season only commenced late in November 2018 due to later than expected rainfall. Notwithstanding the late rainfall, it is expected that deliveries of wattle will increase as a result of the current good rain season.

The exchange rate fluctuated during the period under review and decreased by approximately R2,00 against the dollar compared to the corresponding reporting period.

The mining timber business experienced a difficult period due to prolonged strikes at the gold mines since 25 November 2018 which led to a 28% decrease in sales volumes.

The pole treatment plant performed well and plans are underway to increase production capacity to meet the demand for the various products.

The TWK plantations are performing satisfactorily due to strong demand for eucalyptus pulpwood. The planting of timber is on schedule. The good rainfall experienced will ensure the realisation of the required tree growth.

Due to good rainfall from December to February, TWK's maize crops look promising and it is anticipated that these will yield positive returns.

Retail and mechanisation

TWK operates 27 retail outlets that are strategically positioned in Mpumalanga, KwaZulu-Natal and Swaziland.

Revenue for the Retail and Mechanisation (Trade) division decreased by 1,5% from R1,624 billion to R1,599 billion which is mainly attributable to a decrease in fertiliser sales during this period. Fertiliser sales decreased by 1,7% mainly due to the later than normal rainfall in certain areas of the country and competition in the market. The lower revenue as well as the pressure on fertiliser margins due to competition had a negative effect on the segment's net profit, with EBITDA decreasing by 35,6% from R72,56 million to R46,71 million and the EBITDA margin decreasing from 4,5% to 2,9% as a result. General trading conditions in the retail stores did improve during the period which, together with effective cost and operating capital management, supported the profitability of the segment.

Areas such as the North West, the Eastern and Western Cape and some parts of KwaZulu-Natal where TWK operates, suffered from droughts with a concomitant decrease in sales in certain areas. The central and northern parts of KwaZulu-Natal, as well as Mpumalanga experienced good rainfall with a slight decline in sales compared to the same period in the previous year.

Tough trading conditions in the fertiliser market forced certain competitors to lower their margins in order to retain sales which impacted TWK's margins. During the period under review, global prices of fertiliser declined due to an international over-supply. This placed further pressure on margins as stocks that were previously imported at lower margins had to be sold. New entrants to the fertiliser industry likewise exerted pressure on margins as they strived to increase market share at the expense of profitability.

It is expected that the fertiliser market conditions will not improve during the coming six months and that sales and margins will remain under pressure. Good winter rainfall in the Western and Southern Cape will, however, ease this pressure if farmers proceed with normal planting. Continued focus on strategic stock purchases and effective cost control will assist in combating the negative effect on net turnover for the coming six months compared to the agricultural market in general.

Operational review continued

Financial services

The Financial services division reported an increase in revenue of 22,6% from R69,87 million to R85,68 million, due to the growth of its footprint by approximately 4,1% in hectares insured and an increase of the total debtor book of 19,0%. EBITDA increased by 22,3% from R40,15 million to R49,10 million.

The short-term insurance market experienced significant changes in legislation and new compliance requirements during the past six months. This caused the inability of smaller brokers and/or brokerages to function effectively, thus having to seek alternatives either by exiting the market or joining larger groups offering them the necessary support and security. TWK insurance was able to grow organically and successfully integrated some of these smaller brokerages.

The prolonged drought of the past three seasons put severe pressure on farmers which negatively impacted crop insurance premiums. TWK was, however, able to expand the geographic footprint of the crop insurance business and it is anticipated that total crop insurance premiums received will exceed those of the previous year.

The Credit division performed exceptionally well during the past six months. The seasonal facilities, in particular, reflected strong growth of 13,5% compared to the same period in the previous year. This growth is attributable to the appointment of credit marketers. The bridging facilities were, however, materially higher than the previous period and can be attributed to the inability of cotton farmers to deliver their product as yet.

In order to produce competitively and successfully, TWK understands that its clients and producers must have access to competitive credit which can be adapted to their unique circumstances. Through the application of TWK's effective credit policy, which limits credit risk, while still supporting growth, the Credit division was able to deliver strong results with low levels of uncollectable debt.

Grain

The Grain division's revenue increased by 51,8% to R478,74 million mostly because of a sharp rise in grain prices since September 2018 as well as an increase of 15,0% in the production volumes of the processing plants. Although higher volumes were achieved at the production plants, the high grain prices have placed pressure on the margins of maize meal and animal feed. The storage volumes at TWK's silos were also lower due to the 2018's lower crop yields which negatively impacted the revenue and results of the segment. The Animal Feed factory in Mkondo again delivered poor results for the period. This was mainly due to the severe reduction in production volumes. Should the recently implemented strategy not prove to be effective, management will have to take more drastic action. All of the above resulted in EBITDA decreasing by a disappointing 50,1% to R8,42 million from R16,88 million. The EBITDA margin declined to 1,8% (Feb 2018: 5,4%).

Grain prices increased sharply in South Africa due to the planting problems farmers experienced because of the extremely late rains caused by the El Niño weather pattern. The local crop size is still unknown at this stage because of the late rains in large parts of the summer rainfall area. The higher grain prices are placing pressure on the margins of maize meal and animal feed, and the situation is expected to continue for the rest of the year unless good rains are experienced for the remainder of the growing season. The late plantings are also vulnerable to early frost. The crop in the TWK region is currently very promising and TWK expects a good crop which will benefit the storage facilities.

Operational review continued

Motors and tyres

The Toyota and Hino division outperformed the generally disappointing South African trend in new car sales. The total increase in unit sales of 2,3% for the Toyota and Hino division is due to market penetration and a strong increase of 50% in commercial vehicle sales numbers. The Isuzu division, however followed the general trend with a total decrease of 9,6% in units sold. Gross profit remained under severe pressure, with a concomitant decrease in the net results.

The filling stations results decreased in comparison with the previous period due to upgrades at Elukwatini, which resulted in low volumes sold. The upgrades are expected to be completed during April whereafter volumes are expected to increase to normal capacity. The first filling station in Ermelo was opened in December 2018 and has already delivered satisfactory results. The development of the second filling station in Ermelo as well as a shopping centre is ongoing and it is expected that these investments will contribute to the segment's growth and profitability in the near future. The sales volumes in the Tyre division increased by 5,5% when compared to the previous period, which was supported by the extension in the Middelburg and the Gautena area. Total revenue of the Motor and Tyre seament is flat at R518,13 million and EBITDA decreased by 32,5% to R9,31 million from R13,81 million. The EBITDA margin decreased from 2,7% to 1,8%.

Prospects for domestic new vehicle sales, particularly the new car market, will be affected by the subdued current macro-economic environment and pressure on household disposable income in general. Tyre service points at TWK Total fuel stations will be expanded which will support the business and its profitability.

Prospects

Management is very pleased with the six months' performance ended 28 February 2019, the strong financial position and the continued momentum in the organisation.

Through the rigorous application and execution of TWK's strategic and operational efficiencies through effective cost management and optimal inventory levels, TWK is confident that the growth will continue. The strategic growth in the Group's footprint and the additions of new businesses delivered the desired results. It is therefore expected that the good momentum built up by the different segments will continue and that the results of previous years will be exceeded.

The Group remains well placed to grow revenue through ongoing product innovation and expansion. It will benefit from opportunities that arise as and when it occurs and any decisions it makes will be in the best interest of its shareholders. The Group has sufficient headroom to enable it to conform to covenants on its existing borrowings, and sufficient working capital and undrawn financing facilities to service its operating activities and ongoing investments.

South African agriculture is known for fluctuating agricultural conditions and severe droughts. However, TWK's business model and operations have a number of risk mitigating levers to soften challenges and risks. Following on its successful attempts to optimise the capital structure, TWK is well positioned going forward and remains focused on its strategy to ensure total shareholder returns in a sustainable and responsible manner. Through TWK's strong cash flow generation and financial position, it is well positioned to capitalise on new opportunities with the confidence in its ability to deliver a differentiated value proposition for investors.

Notes

1. Related party transactions

1.1 Trade debtors – Directors

Trade debtors comprise of production accounts as well as other accounts for which customers of the Company qualify. Credit extension, repayment terms and interest rates in respect of loans are in line with Company policy, which applies to all customers of the Company.

As at 28 February 2019, R17,62 million (2018: R35,6 million) was owed to the Group by the directors and their related entities, on the above mentioned accounts. This is covered by security held in terms of the credit policy.

2. Acquisition of property plant and equipment

During the six months ended 28 February 2019 the Group acquired property, plant and equipment of R104,08 million (2018: R46,8 million).

3. Fair value

The fair value measurements recognised in the statement of financial position or disclosed in the Group's financial statements by class of asset or liability is categorised by level according to the significance of inputs used in making the measurements. The different levels are defined as follows:

- Level 1: Represents those assets which are measured using unadjusted quoted prices in active markets for identical assets or liabilities that the Group can access at measurement date.
- Level 2: Inputs other than quoted prices that are observable for the assets either directly (as prices) or indirectly (derived from prices).
- Level 3: Applies to inputs which are not based on observable market data.

There were no changes in levels or new items added since the annual financial statements of 31 August 2018.

By order of the Board of Directors

Rulager

Chairman RL Meyer

Ky yout

Chief Executive Officer AS Myburgh

Chief Financial Officer JEW Fivaz
